4.6	Results for randomizations	6
4.7	Short about the implementation / tools	6
5	Conclusion	7

1 Abstract

1.1 Background

1.2 Results

1.3 Conclusion

2 Introduction

2.1 What is clustering?

2.2 "The clustering problem"

2.2.1 Determining parameters

3 Background

3.1 Transitivity Clustering

3.2 Hierarchical Clustering

3.3 Cluster Validation

3.4 Multidimensional Scaling

3.5 GAP Statistics

4 Method

4.1 Assessing best clustering

4.2 Randomization approach 1

4.3 Randomization approach 2

4.4 Randomization approach 3

4.5 Randomization approach 4

4.6 Results for randomizations

4.7 Short about the implementation / tools

5 Conclusion
